# Structured Products in Perspective

- **Structured products v. investment grade & high yield bond ETFs**
- **Structured products v. Equity ETFs**

Comparison against an investment in fixed-income

## Key points

- Structured products have generated more **stable and higher** returns than an investment in a bond ETF with same duration.
- Since the beginning in the year, structured products' outperformed supported by many **autocalling products** amid markets rally.
- Rising inflation and potential **increase in interest rates** have put pressure on fixed-income investments.

Comparison against a direct investment in equities

## Key points

- Structured products have delivered more **regular, stable and visible** return compared to a direct investment.
- **Controlled** exposure to risky asset class.
- Performance **peaked up and stabilised** since markets crash in 2020.
- Average returns **increased by 2%** compared to the annualised average recorded since 2015.

## Conclusions

- **Regularity and visibility of structured products' performance**
- **Improved return compared to investment in the bond market.**
- **Controlled exposure to risky assets, i.e. equity markets**
- **Capacity to deliver return under different market conditions.**
- **Additional security and flexibility in the structures going forward**
